

CONTENTS BY NUMBERS.

"The Voice that rolls the stars along
Speaks all the promises."

MARCH, 1882.

ARTICLES:	PAGE.
Comets:—Their composition, purpose and effect on the earth—Lewis Boss.....	1
Astronomical observatories in the United States.....	8
Constitution of the Sun.....	8
Short-period comets.....	9
Comets of 1881.....	10
The Sun.....	15
Time-Service of Carleton college observatory.....	16
EDITORIAL NOTES:	
Introductory....To teachers of astronomy....Warner prizes....Prof. Pickering's stellar spectroscope....Prof. Chandler's work on variable stars....Halsted observatory....Horological bureau of Yale college observatory....Advantages for astronomical study at Cincinnati observatory....Prof. Hall's work at the Naval observatory....Discovery of minor planet 222....E. E. Barnard....S. W. Burnham....F. Hess....T. A. Smith....E. S. Holden....G. W. Hough....C. F. Emerson....M. W. Harrington.....	19-21

APRIL AND MAY.

ARTICLES:	PAGE.
Hints on double-star observing—S. W. Burnham	1
The American Standard Time company.....	17
Standard time.....	19
Dr. Gould's southern zones.....	20
Stone's Durchmusterung.....	22
Observing-seat for equatorial—G. W. Hough.....	23
Historic notes on cosmic physiology—T. Sterry Hunt.....	26
On a simple method of measuring faint spectra—Wm. Harkness.....	28
Transit of Mercury—Charles H. Rockwell.....	29
Cincinnati work—Ormond Stone.....	32
Nashville report.....	33
EDITORIAL NOTES:	
Messenger....Mr. Burnham's article....New comet....Washington....Baltimore....Pittsburgh....British navy estimates....Prof. Folie's tables....Harvard college observations....Asteroids....German astronomical society....Zone observations....Report from Willet's Point....Lick observatory....Mass of Jupiter....Cape of Good Hope....Spectrum photography....Baron Dembowski....Greenwich observatory publication....Parallax of Mu Cephei....Radcliffe observatory....Zone observations of the German Astronomical Society....Mr. Rutherford's photography and diffraction grating....Beloit observatory....Comet-seeking....A variable star....Short-period comets....Lehigh University....Principal E. L. Schaefer....New minor planet....Fauth & Co....P. H. Dudley....Wm. Bond & Sons....Errata.....	36-48

JUNE.

ARTICLES:	PAGE.
Hints on double-star observing, (concluded)—S. W. Burnham.....	73
Aurora Borealis in Minnesota—Chas. S. Bryant.....	83
Observing and recording meteoric phenomena—E. F. Sawyer.....	91
CORRESPONDENCE:	
Note on O ² Eridani—A. Hall.....	94
Hints on double-star observing—O. Stone.....	95
Wells' comet. G. W. Hough.....	96
EDITORIAL NOTES:	
William R. Brook's observations....Comet Wells....Prof. Stone's appointment as director of the Leander McCormick observatory of Virginia....Moon pictures....Warner scientific prizes....Death of Rear Admiral John D. Rodgers....Remarkable Vacuity....Auroral displays....Mr. John Byrne's telescopes....Mr. Hess' observations of the comet....Solar eclipse....Vienna refractor....The Lyrid meteors....Flint disc for Lick observatory....C. H. R. and May Messenger....Mr. Draper's photographs....Lalande prize....Definite positions of the Red Stars....New astronomical journal....Spectrum of the nebula of Orion....Transit of Venus....Names of new planets....Variable Stars.....	96-104

NOTE OF CORRECTION.

The numbers in parentheses in the index do not give the right pages in Nos. 2 and 3 of this volume. The reprints of these numbers have been paged consecutively after the first number. If 24 is added to the parenthetical numbers of the index the right page will be found.

AUGUST.

ARTICLES:

The Wedge photometer..E. C. Pickering.....	105
Double meteors..Lewis Swift.....	108
Bright wire illumination..S. W. Burnham.....	110
Photographic spectrum of Comet Wells..Dr. W. Huggins.....	114
Grating for optical purposes..H. A. Rowland.....	116
American association for the advancement of science.....	122
List of Northern stars for time determination..E. S. Holden.....	124

CORRESPONDENCE:

The Warner scientific prizes.....	125
The Washburn observatory..H. S. Pritchett.....	126

EDITORIAL NOTES:

Wells' comet....Transit of Venus....Late total eclipse....Asteroid Zones....	
Suspected variable stars....Olivet observatory....Halsted observatory....Alle-	
gheny observatory....Yale college observatory....New Windsor observatory ..	
Lick observatory....Parallaxes of Southern stars....Solar parallax....Dun	
Echt circular....Observatory at Trasikent....Transit of Venus....Variability of	
Red stars....The Lick Sidereal clock....Barnard's new nebula....New minor	
planet....Personal....F. Hess....S. W. Burnham ..Prof. Hough....Prof. H. A.	
Howe....Wisconsin university degrees....J. A. Brashear....Prof. Stone....	
John Hagen..S. J....John Byrne....H. C. Wilson....Dr. Waldo.....	127-137

OCTOBER.

ARTICLES:

Small planetary nebula..E. C. Pickering.....	139
The August meteors..Daniel Kirkwood.....	141
Transit of Venus (abstract)..Wm. Harkness.....	143
The evolution of the earth (abstract)..Dr. Samuel Houghton.....	147
Hints on observing meteors..E. F. Sawyer.....	150
The solar eclipse of May 1883 (abstract)..C. H. Rockwell.....	152
Transit of Venus..F. Hess.....	153
Distances of the stars.....	161

EDITORIAL NOTES:

Annual meeting of the A. A. A. S. at Montreal....Report of Prof. C. A. Hough	
....Heliometer of Yale college observatoryComet Cruls' elements and ephem-	
erides....Prof. Youngs' observations....Barnard's comet....Red star....New neb-	
ula....Prof. Holden's annual report....Star Yarnall 3106....Translation of	
Herschel's life &c....New twelve-inch telescope for West Point observatory....	
Observatory at Liege, Belgium....Variable star....Transit of VenusDr. C. S.	
Hastings....Prof. Kuoland's Gratings....Star Yarnall 2892.....	162-170

NOVEMBER.

ARTICLES:

Comet Cruls..C. S. Hastings.....	171
Drifting meteor trains..E. E. Barnard.....	174
Standard time..Admiral Rodgers (late).....	180
Transit of Venus..Edgar Frisby.....	182
Unification of time. (abstract)..Dr. Ulbricht.....	184
Observations of comet 'B' 1882..C. A. Young.....	187

EDITORIAL NOTES:

Manuscript for MESSENGER....Discovery of a new comet by J. F. J. Schmitt....	
Prof. Youngs' observation of Comet Cruls (illustrated)....Observer Hess' obser-	
vations....Instructions of the American commission for observing the transit of	
Venus....Professional papers of the U. S. signal service....U. S. Transit of Ven-	
us parties and stations....Prof. Langley's solar researches in high altitudes....	
Mr. Charles H. Rockwell's notes on the total solar eclipse of 1883....Chandler's	
elliptical elements of Comet Cruls....Dr. H. Oppenheim's parabolic elements....	
....Prof. C. Piazzi Smyth....Prof. E. Frisby's observations of the comet....	
Prof. H. S. S. Smith's observations of the same....New observatory at Bogota,	
(Columbia, S. A.)....Lick observatory....The work of the observatory of Paris	
for 1882....Star 3020....Proper motions of Lacaille 4955....The Gemenoid show-	
er....W. B. Brook's observationsTransit of Venus parties....Star O. Arg.	
15,292....Comet Cruls....Telescope for Beloit college....F. W. Bookwalter's	
instruments....Mr. John Clacey's new telescopes....H. C. Wilson's observa-	
tions....Jas. W. Queen's astronomical slides....Schroeter's new work on	
Mars.....	190-204

DECEMBER.

ARTICLES.

Method of reducing different catalogues, etc. (abstract)..W. A. Rogers.....	206
Recent contributions to our knowledge of the moon..A. Marth.....	208

New form of level (abstract).....Wm. A. Rogers.....	210
The earth.....Rev. O. Fisher.....	213
The computation of a parabolic orbit.....	217
Notes on the great comet of 1882.....E. E. Barnard.....	221
When will the comet return.....	224
Elements of Gould's comet.....Mr. Morrison.....	227

EDITORIAL NOTES:

The great comet.....A. N. Skinner's observations of the same.....Newcomb's times of the four contacts in the transit of Venus.....An unrecorded comet.....Chandler's parabolic elements and ephemeris of Gould's comet.....Prof. Howe's elliptic elements of the same.....Prof. Shurtle's comet notes illustrate.....Corrections of Prof. Young's observations.....Parallax of star Bradley 3077.....The McCormick observatory of Virginia.....New star of 1848.....Schroeter's observations of Mersa.....B. A. C. 743.....Prof. E. Frisby's observations of Gould's comet.....Observations of Barnard's comet by Prof. Frisby.....Meteors of November 14, 1882.....Prof. Pickering's plan for securing observations of the variable stars.....Prof. Swift's notes on the comet.....Prof. Smith's time-service.....Mr. C. H. Rockwell's observing party.....Dr. Hastings note on the coincidence of sun-spot activity and perihelion of Comet Gould.....Mr. Barnard's new nebula and its place by Mr. Wendell.....	228-238
